

TABLE OF CONTENTS

GENERAL PHYSICS

I.	Molecule Microscopy	1
	Factors Affecting Resolution of Scanning Desorption Molecule Microscopy	1
II.	Physical Electronics and Surface Physics	9
	Permeation of Hydrogen through Metals	9
III.	Atomic Resonance and Scattering	21
	Two-Photon High-Resolution Spectroscopy	21
IV.	Quantum Electronics	25
	Nonlinear Phenomena	25
	Short Laser Pulses: Passive Mode-Locking Solution	25
V.	Microwave and Millimeter Wave Techniques	31
	Low-Temperature Millimeter Wave Receivers	31
	Frequency-Power Formulas for Josephson Junctions	31
	K-band GaAs Schottky-Barrier Diode Mixer	33
	118-GHz Mixer Development	34
VI.	Radio Astronomy	35
	Environmental Sensing with Nimbus Satellite Passive Microwave Spectrometers	35
VII.	Transport Phenomena in Solids	41
	The Anisotropy Ratio of Electrical Conductivity in Graphite	41
VIII.	Physical Acoustics	43
	Attenuation of Sound in Turbulent Pipe Flow	43
	Interaction of Sound with a Side-Branch Cavity	43
	Acoustics of an Open-Ended Tube with Flow	44

PLASMA DYNAMICS

IX.	Plasma Dynamics	47
	Laser-Plasma Interactions	48
	Two- and Three-Dimensional Stability Analysis for Second-Order Laser-Plasma Interactions	48
	Three-Dimensional Dispersion Relations for Third- Order Laser-Plasma Interactions	59

CONTENTS

Intense Relativistic Beam-Plasma Interactions	75
Structure of Plasma Generated by Irradiation of a Solid Target from a Pulsed CO ₂ Laser	75
Magnetic Insulation of an Intense Relativistic Electron Beam	82
Beam-Plasma Interaction in a Longitudinal Density Gradient	86
Experimental Studies – Waves, Turbulence, and Radiation	93
Wave Conversion near Lower Hybrid Resonance	93
General Theory	105
Parametric Excitation of Ion Waves by Resonance Cone Fields near the Lower Hybrid Frequency	105
Three-Dimensional Pulse Evolution of Coupled Wave- Wave Interactions	112
Third-Order Nonlinear Wave-Wave Interactions: A Differential-Equation Approach	117
COMMUNICATION SCIENCES AND ENGINEERING	
X. Processing and Transmission of Information	129
Optical Channels	129
Uniqueness of the Optimum Receiver for the M-ary Pure State Problem	129
Complexity of Networks and Algorithms	131
Complexity of Acceptors for Prefix Codes	131
XI. Digital Signal Processing	143
Using a Two-Dimensional Discrete Hilbert Transform to Factor Two-Dimensional Polynomials	143
Recursibility of Two-Dimensional Difference Equations	151
XII. Linguistics	159
The Semantics of Growth	159
XIII. Cognitive Information Processing	163
Text-to-Speech Conversion	163
<u>Locally Organized Parser</u> for Spoken Input	163
XIV. Communications Biophysics	169
Animal Communication	169
The Shaking Dance of Honeybee Workers: Evidence for Age Discrimination	169
