

## **9.14**

### **Classes #19-20: Taste and olfactory systems**

**Wednesday March 16; Friday March 18, 2005**

*Questions based on lectures:*

11. Study of olfactory projections in what “primitive” species has provided evidence for an early dominance of the olfactory system in evolution of the endbrain?
12. Contrast: “compensatory sprouting” and “compensatory stunting” of lateral olfactory tract axons.
13. What intrinsic factor may explain the above phenomena?
