

9.63 Laboratory in Cognitive Science (Fall 2005)

II - CogLab Presentation (1 presentation for the semester)

- We send you an excel file with the collected data from all the participants
- You run a statistic (using excel or matlab)
- You plot the group graph
- You think about the results
- You talk in class about the group results
- We discuss the results and their interpretation with the class

Collaboration Policy (from the handbook, *Academic Integrity at MIT.*)

“In preparing your reports, you are encouraged to discuss your results with your class mates, Data and Figures may be shared between students in your class group for the purpose of preparing your report (article), providing proper acknowledgments in made in your report (article).”

“All writing [in 9.63] must be original. Students should not copy any portion of their laboratory report (article) from references materials or the reports of other students. Students should not use reports from previous years or their class mate’s reports in preparing their own reports.”
